# TEAM AT WORK

# SELECTION PROCESS

# PROJECT MANAGEMENT PROCESS

# PROJECT INITIATING

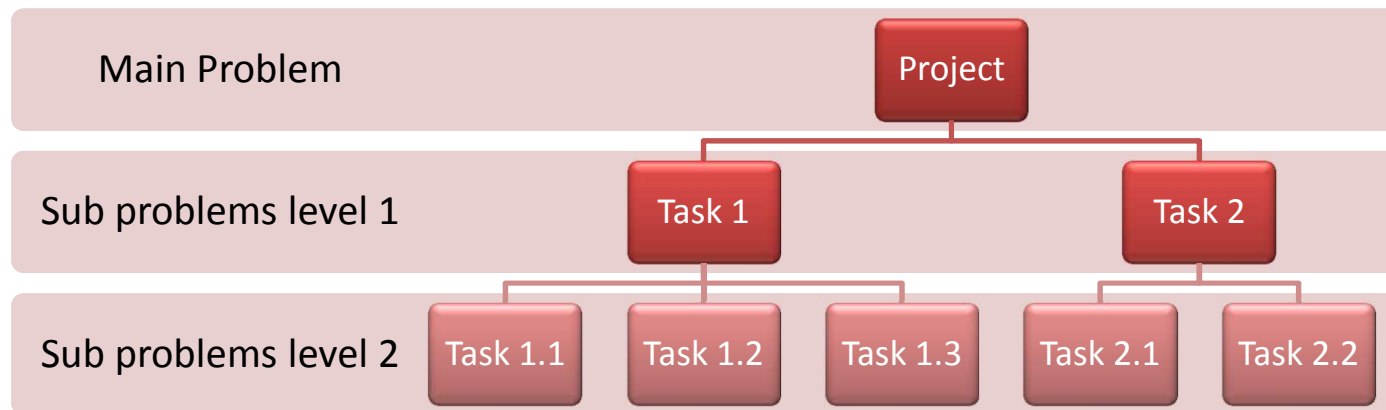

**What problem are you trying to solve ?**

**Take time** to define as **precisely as possible** the scope of the project:

**MAKE IT CLEAR!**

# PROJECT INITIATING

**How will you solve this problem ?**

# PROJECT PLANNING

For **each task**, answer:

Who

- ... have to complete the task ?

When

- ... the task has to be complete ?

Where

- ... will you find the needed resources ?

What

- ... is precisely the task to be complete ?

# PROJECT PLANNING

What **risks** are they that may **jeopardize** the success of each task?

How will the project team **communicate** with each other?

# PROJECT E. M. C.

For each task:  
**E**xecuting, **M**onitoring and **C**ontrolling

Respect the deadlines.

Emphases on testing protocols.

Make a trade-off between efficiency and simplicity.

Write detailed reports on technical aspects, monitoring and control issues.

# PROJECT CLOSING

Have you reached the goal?

Yes?

Prove it using the data you gathered during monitoring and controlling processes.

No?

- Detail the ending point of your project using the data you gathered during monitoring and controlling processes.
- What need to be done now to complete the project?

# TEAM MANAGEMENT
